REPAIR PARTS IDENTIFICATION

Your machine has a Product Identification Number (PIN) plate. The plate looks like the sample at right. For easy reference, locate the PIN plate at the location shown on the figure below. Record the number on this sheet. When requiring repair parts, take this number into your dealer.

NOTE: This PIN plate replaces the Serial Number plate found on machines manufactured prior to May 2004.

INSTRUCTION SHEET
TRANSPORT LOCK INSTALLATION - CULTIVATOR

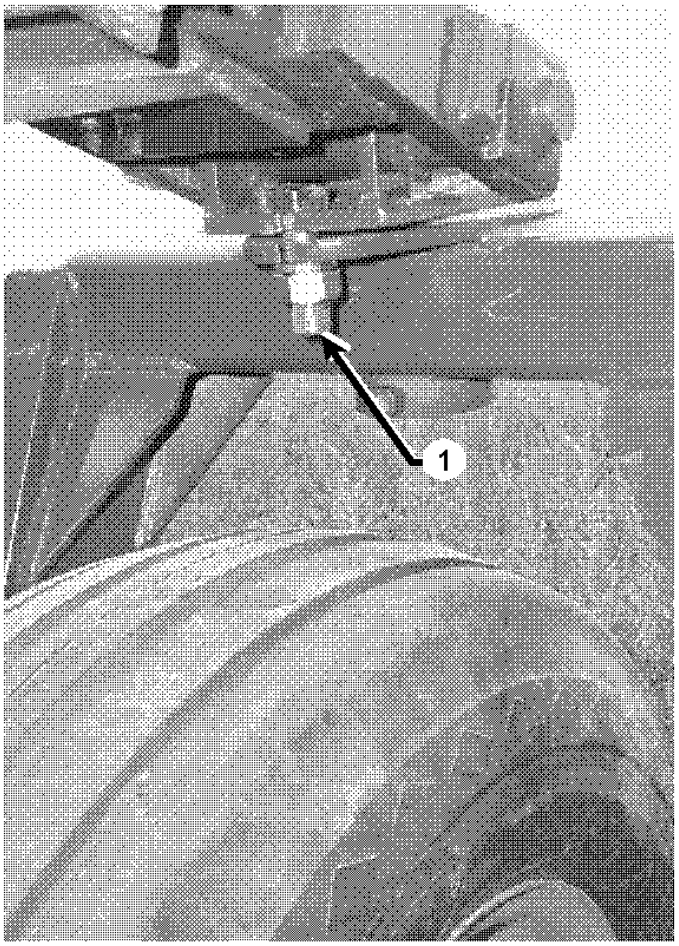

READ ALL INSTRUCTIONS CAREFULLY BEFORE BEGINNING

This instruction sheet describes the necessary steps to install caster transport locks on the cultivator.

IMPORTANT: Caster locks are to prevent erratic oscillation and caster damage at transport speeds.
- Caster locks are to be used for high speed transport only. Not required for tractor towing.
- When casters are locked, DO NOT corner short enough to contact pins or damage can result.
- DO NOT back up with caster locks engaged.

Pull the machine ahead approximately 5 meters (20 feet) to ensure the casters are facing straight forward.

Install one 3/4" x 2 1/2" coarse thread bolt (1) with a lockwasher and nut into the back of each caster as shown. Tighten the transport lock bolt (1) until the lockwasher is compressed. Do not over tighten.
